Highlights

The screenshot shows the ScotPHO Profiles home page. At the top is a navigation bar with 'Home' and 'Profiles' links, and on the right, 'Download data', 'SourceCode', and 'More information'. Below the navigation bar is a blue header section with the title 'Welcome to the ScotPHO Profiles' and the subtitle 'Explore over 250 indicators of public health.' There are two buttons: 'About us' and 'About indicators/updates'. Below this is a grid of nine profile cards. The first row contains 'Health and Wellbeing', 'Care and Wellbeing Portfolio', and 'Adult Mental Health'. The second row contains 'Tobacco Control', 'Alcohol', and 'Drugs'. The third row contains 'Children and Young People', 'Population', and 'All Indicators'. Below the grid is a 'What's new' section with three items: 'Profiles Tool Redesign', 'New Mental Health Profile for Adults', and 'Feedback'. The footer contains four columns: 'Other Profiles', 'Source Code', 'Learning Resources', and 'Stay in touch'.

Welcome to the ScotPHO Profiles

Explore over 250 indicators of public health.

About us About indicators/updates

Health and Wellbeing

View indicators relating to **Behaviours, Crime, Economy, Life expectancy and Mortality, ill health and injury.**

Care and Wellbeing Portfolio

View indicators relating to **Population health, Inequalities and Wider determinants** (part of the Scottish Government's Care and Wellbeing Portfolio).

Adult Mental Health

View indicators relating to **Mental health outcomes, and Individual, Community and Structural determinants** for adults. Forthcoming in 2025: indicators for children and young people.

Tobacco Control

View indicators relating to **Adult prevalence, Smoking during and post pregnancy, Smoking attributable deaths and diseases and Smoking cessation and services.**

Alcohol

View indicators relating to **Community safety, Environment, Health, Prevalence and Services.**

Drugs

View indicators relating to **Community safety, Environment, Health, Prevalence and Services.**

Children and Young People

View indicators relating to the **Active, Healthy, Achieving, Safe and Nurtured** domains.

Population

View **population estimates** for different age groups.

All Indicators

View **all indicators** in this tool from across every profile.

What's new

Profiles Tool Redesign

Following user feedback ScotPHO have redesigned this online profiles tool. The new design simplifies navigation between different visualisations and over time will allow us to introduce additional visualisations such as indicator splits by variables such as age, sex and ethnicity. The changes will also enable ScotPHO to respond to requests for additional profiles. [Further details](#) of the new features and additional user guidance are available.

New Mental Health Profile for Adults

The Mental Health Profile for Adults is the result of Public Health Scotland's [Mental Health Indicators project](#). The mental health indicators include measures of mental health outcomes, as well as of a wide range of interconnected determinants (risk factors and protective factors) of these outcomes. ScotPHO have recently published this profile for indicators in adults and are currently working on the profile for children and young people.

Feedback

Profile summary: sub-national

Spine charts

Summary Trends Rank Deprivation About this profile

How to interpret table results

The results below provide a snapshot of the latest data for each indicator in this profile at your selected geography level. If you have selected a local area from the geography filter above, you will see a 'spine chart' for each indicator. These charts show where your selected local area fits in amongst the range of values and the national average. For example, comparing a particular health board against all other health boards. Results can be interpreted using the key below:

orange - worse than national average

blue - better than national average

grey - not statistically different to Scotland

white - no difference to be calculated
